1600 Pennsylvania Avenue NW  
Washington, D.C. 20500

Appeal for Collaboration: The kind of world that I dream about- How to Leverage Technology to Fight Corruption in Nigeria and Foster Harmony in America.

Dear President Biden,

I hope this letter finds you in good health and high spirits. As an American citizen and a proud Nigerian, I write to bring your attention to the critical issues affecting our nations. The pervasive problems of corruption in Nigeria and racism in America deeply concern me. These pressing challenges have spurred my contemplation on how technology can be harnessed to tackle these formidable issues. I firmly believe that American technological advancements can play a pivotal role in effectively combating these problems. Through extensive research, I have identified two specific technologies that hold promise in fostering interracial harmony in the United States and combating corruption in Nigeria.

Nigeria has a history marred by a persistent failure of the political class to address corruption, resulting in the country becoming the poverty capital of the world and one of the most corrupt nations, having lost an estimated \$500 billion to corruption since gaining independence. Meanwhile, racism continues to pose a significant obstacle to national unity in the United States. The divisions caused by racism perpetuate inequalities within society, making it challenging to cultivate a sense of unity and harmony among Americans. As you have astutely stated, "We must continue to acknowledge and confront the deep-seated racial inequities in our society and work to dismantle systemic racism." Corruption, too, has been likened to a cancer that erodes citizens' trust in democracy, innovation, and creativity in Nigeria.

To address these formidable challenges, my company is actively seeking grants, investors, and partners for a proposal aimed at developing a social media technology to foster interracial harmony in America. Additionally, we have partnered with a technology firm in the United States to create automated digital solutions and artificial intelligence systems that can be customized to combat corruption at all levels of the Nigerian government. This technology streamlines the procurement process, effectively preventing contract fraud, embezzlement, and contract inflation. Furthermore, it can be utilized to ensure transparent elections by instantly uploading polling unit results to an accessible portal, enabling citizens to view the outcomes without the need for authentication.

In an era where technology rapidly transforms every facet of our lives, the United States can leverage its technological prowess to disrupt and combat corruption in Nigeria. I firmly believe that this project has the potential to strengthen democratic institutions in Nigeria and contribute to tax revenues for both the Nigerian and United States governments.

I earnestly urge President Biden to prioritize this project as a crucial component of America's foreign policy towards Nigeria. I also want to express my deep appreciation for your unwavering dedication to fostering interracial harmony, as evidenced by the formation of the most diverse administration in the history of the United States. I aspire to contribute to your efforts in promoting unity and interracial harmony through the utilization of technology. Additionally, I am in favor of the advocacy for student loan forgiveness, as it would greatly alleviate my burden of student loan debt.

Furthermore, I would like to extend my gratitude to Governor Mark Dayton for providing me with the opportunity to serve as an intern in his office. I am genuinely grateful. I would also like to commend Governor Tim Walz for his outstanding work in Minnesota, leading the state to achieve an impressive budget surplus. Minnesota has become a model state, both as an excellent place to live and raise a family and as a state that protects the rights of women and people of color.

Moreover, I extend my heartfelt congratulations to President Bola Ahmed Tinubu and Senator Oluremi Tinubu, his esteemed wife, who serves as a clergywoman and influential supporter of his leadership. I acknowledge the divine grace bestowed upon the first family and would like to cordially invite them to join us in unveiling our proposal on combating corruption at the forthcoming #FutureofNigeria-fight corruption now conference.

I firmly believe that President Tinubu will vigorously combat corruption and contribute to the betterment of Nigeria. I urge him to prioritize the battle against corruption, and I eagerly anticipate the opportunity to collaborate with his administration to effectively curb corruption in Nigeria. Together, we can foster harmony in America through technology and establish an unparalleled digital government on an unprecedented scale in Nigeria.

Thank you for your attention to this matter. I would be grateful for an opportunity to discuss this proposal further and explore avenues of collaboration. I believe that by joining forces, we can make significant strides in eradicating corruption and racism, thereby fostering a more prosperous and harmonious future for both our nations.

With sincere appreciation and warm regards,

Mac Eze Nwachukwu
